## Climbing American Beauty

"A hardy Climbing Rose which in size of flower, color, form and fragrance is equal to its parent, the grand cut-flower Rose, American Beauty."

### SOFT GLOWING RED

(Hardy June blooming.) Climbing American Beauty, the new porch Rose, gives us a new Rose of wonderful beauty and merit. It is a cross between the world famous cut-flower Rose, American Beauty, and an unnamed seedling. It is an American production, the product of American Rose growers. It is perfectly hardy, strong growing, making canes from ten to fifteen feet in a season; a perfect mass of bloom in June and produces flowers occasionally all through the growing season. The foliage is large, bright, glossy green, and never shows signs of any of the diseases that affect Roses. The color is a soft, glowing red; identical with the American Beauty, and with the same exquisite fragrance. The flowers are of a size three to four inches in diameter, finely formed on long stems, and are produced in great profusion. This new Rose will bloom in almost any situation where a climbing, pillar or porch Rose is desired. Success beyond expectations has been found in producing a climbing Rose of the same color, size of flower and fragrance of its pollen parent, the American Beauty, with the addition of better foliage and blooming qualities; one plant producing twenty times as many flowers in June as the American Beauty bush

# POPULAR HARDY HEDGE PLANTS

The above is an illustration of Ibota Privet hedge resulting from plantings six to twelve inches apart. When not trimmed, the appearance of growth is spreading, somewhat like the Japan Barberry, (described below) California Privet is very similar.

**California Privet 85c per doz.**  
 "Cheaper than Fences, far more beautiful."

Of all hedge plants this is the most popular, and more of it is planted than all others combined. It is of free growth and succeeds under the most adverse conditions, such as under dense shade of trees, where other plants would not exist. Its foliage is a rich, dark green nearly evergreen, remaining on the plant until mid-winter. Nice plants, 85c per dozen; \$6.00 per 100. Two-year plants, \$1.20 per dozen; \$9.00 per 100. Large two-year plants, \$1.50 per dozen; \$11.25 per 100.

**Ibota Privet \$1.50 per doz.**  
 "The Most Valuable of the Privet Family."

This variety of Privet is generally acknowledged to be the best produced. More spreading than the California. It is of dense growth, good green foliage, grows well in all soils. It can be trimmed as desired and will give the straight line hedge or the spreading type as would be represented by its natural growth. It is becoming more popular every year. Highly recommended. Nice plants, \$1.50 per dozen; \$10.00 per 100. Stronger plants, \$2.00 per dozen; \$2.50 per 100. Two-year plants, \$2.25 per dozen; \$14.00 per 100. Large two-year plants, \$2.75 per dozen.

**Japan Barberry \$1.25 per doz.**  
 "Grows anywhere, branching gracefully; striking color."

(Berberis Thunbergii.) Where a dwarf deciduous hedge is wanted, nothing equals this beautiful Barberry. Requires but little pruning to keep in shape. The leaves are small, light green, and towards fall assume rich, brilliant colors, the fruit or berries becoming scarlet. Absolutely hardy in all parts of the country. Nice plants, \$1.25 per dozen; \$8.00 per 100. Stronger plants, \$1.50 per dozen; \$12.00 per 100. Two-year plants, \$2.00 per dozen; \$15.00 per 100. Large two-year plants, \$4.50 per dozen; \$35.00 per 100. Selected plants, 50c to \$1.00 ea.

**Amoor River Privet \$1.00 per doz.**

This Chinese variety, very hardy, has dark green leaves, which persist almost through the winter. Where a stiff, upright hedge is wanted nothing surpasses the Amoor. To add to its attractiveness in foliage, it bears erect panicles of beautiful white flowers in June, followed by black berries. Price, nice plants, \$1.00 per dozen; \$7.50 per 100. Stronger plants, \$1.35 per dozen; \$10.00 per 100. Two-yr. plants, \$2.00 per dozen; \$15.00 per 100.
